Thanks Daniel, that is helpful. In that case let's make Jonathan Hodgson POC for both Project Minerva and Goose Lake. Many thanks and have a great Labor Day.

Subject: RE: GSDT Account requests

Good morning Ben,

Thank you for the clarification, we will process these accounts and update our records.

The point of contact is different from a signatory who has submitted an electronic signature agreement (ESA). The POC is for GSDT administrative purposes. Multiple users can be signatory authorities provided they have submitted an ESA and hold an appropriate position per 40 CFR 144.32. The permit application must be signed by a responsible corporate officer, however the submission of reports can be delegated to an authorized representative provided that you submit an authorization in writing to your permitting authority.

Please let us know if you have any additional questions.

Best regards,
Dan

Subject: RE: GSDT Account requests

Many thanks for the inquiry. I think our preference is to have me listed as the POC for both Project Minerva and Project Goose Lake. To determine though can you clarify that the POC is also the person who can submit after validation in the GSDT. That is our primary concern. Whom in the organization is the contact person for notifications is important but a secondary consideration for us.

Pending clarification we would want Ross, Jonathan and Kayla to all have GSDT accounts but I should remain the POC for both projects. All the best.

Subject: RE: GSDT Account requests

Good morning Mr. Heard,

We received a couple of re-registration forms for Projects Minerva and Goose Lake and wanted to reach out to you to determine GCS's intent.

Did you want to make Jonathan Hodgson the Project POC for both projects, or just create GSDT accounts for him and Kayla Crawford?

We currently have you listed as the POC for Project Goose Lake and Ross Andrews as the POC for Project Minerva. We generally ask that requests to add or remove users from a GSDT Project come from the Project POC to ensure that the requests are authorized.

Best regards,
EPA GSDT Team
